CUBE

CUBILICIOUS

CUBE by Hettich is an innovative shelving system which is flexible, modern and easy to install. It is a breakthrough in furniture industry as the furniture made with cube system leaves people mesmerized by its design and aesthetics. CUBE can be termed as a furniture system of future.

CUBE: Shelving System Components

► Cover Caps for the basic profile

► The Profiles

► The Connectors

The Structure of Components.

The heart of the system consists of connectors and profiles that can be used according to your own creative ideas. Whether long or short, wide or narrow, open or closed, on the wall or on the floor, almost every piece of furniture will be feasible.

The Safe Connection.

To ensure a high stability, strength and safety, the profiles are connected using threaded pins which are screwed into the connectors. The pins are optionally supplied with a thread securing glue and fastened with 0.8 - 1nm torque. Due to the preset distance of the thread hole, the connection guarantees excellent stability and safety.

Threaded pins matching the profile's surface are available in silver, nickel or black

CUBE: Wall Mounting System

► Invisible wall mounting system: Type 1

Our Idea: An elegant system needs an elegant and discrete fixing solution. The result is simple but unbeatable in its function:

A supporting system that is fastened to the wall in which the furniture element can be hooked and fixed afterwards. The system also allows an easy and precise adjustment of height or depth even after mounting.

The result: the wall mounting system is not visible from the front side and the furniture element is safely and firmly fixed.

Weight Capacity: 15 Kg per connections

► Invisible wall mounting system: Type 2

Alternative: ... it is also possible to fix the system with a flat head screw that afterwards can be covered with a cap.

Note: If the weight of the system (loading) exceeds by 30 kg then please use both type1 and type2 connections for wall.

CUBE: Door System

▸ CUBE: With Hinged Door

Door Inside the frame system

Open the door.

Another option to create your individual piece of furniture:

It is easily possible to mount hinged doors inside or outside of the frame system. If the door is mounted from the outside, the hinge spans the width of the profile (applies for commercially available door hinges that span a width of 16mm).

With this method, even completely closed furniture elements can be created and designed.

Recommended hinges:

Door inside the frame system

Hettich | Sensys8645i B-4 | Distance 5mm (Mounting plate) | Cup distance C = 3mm

CUBE: Sliding System

▸ Sliding System: Overlay

▸ Sliding System: Inset

Overlay Sliding Doors.

Version 1: Functional and design-oriented. Sliding door version which runs with 2 own profiles on the frame system.

The profiles have been designed for Hettich SlideLine M or SlideLine 66 fitting kits.

Upper profile

Lower profile

Inset Sliding Doors.

Version 2: Flush and in a clear line. Sliding door version which runs with 2 own profiles inside the frame system.

The profiles have been designed for Hettich SlideLine M or SlideLine 66 Fitting kits.

Upper profile

Lower profile

CUBE: Top Unit under Mount

► The perfect connection

In order to offer a discreet and stable solution to integrate the system into the already existing furniture elements, we have developed a fastening insert that is as simple as it is efficient.

The connection using the fastening sleeve is screwed into the existing furniture element either at the top or at the bottom. Then simply place the pre-drilled profile in the required position and secure it with a threaded pin... and all is done!

Set of 2 pieces including fastening sleeve, screw and threaded pin.

CUBE: Movable with Wheels

► Castors: Movable with wheels

As for furniture elements that have to be mobile (e.g. tea trolleys, TV stands, etc.), the use of castors is an option. There are many versions available in the market, such as versions with or without brake, which are compatible with our system.

The castors should be equipped with an M8 thread and can easily be mounted by using our connecting thread.

CUBE: Other Optional Accessories

► Cover caps for the basic profile

The Cover cap is used to cover an open basic profile and most suitable for building a piece of furniture that is exposed to heavy loads, e.g. when building a table leg or similar.

Flat Cover cap is used to simply cover an open profile and has a smaller thickness.

Both caps are simply pushed into the profile's end to obtain a safe and neat finish.

► Adjustable foot & connecting thread

A flexible height adjustment of the furniture leg is very important in furniture design.

Our version offers an adjustable range of height from 0 to 20 mm.

The foot is simply screwed into the profile's end with the help of our connecting thread.

This offers an optimal and quick solution to create height-adjustable furniture feet: saw the profile to the required length, insert the connecting thread and screw in the furniture foot, Finished!

► Self-adhesive felt pads

If your piece of furniture touches the floor with its side profiles and connecting nodes, we recommend the use of our custom-fit felt pads to protect your furniture and your floor from being scratched.

CUBE: Profile and Connectors Colour Available

	Profiles	Connecting nodes

Revivifying the way Bathrooms are made.

A refreshing start to the day, and a relaxing soak in the evening: the bathroom is the home's haven of pampering and indulgence. The modern bathrooms need the modern day interiors which is why Hettich has come out with minimalistic, innovative, sleek & simple furniture solutions.

The CUBE by Hettich revivifies the way home furniture was made. It offers great space and aesthetics, is very less time consuming whereas installing and assembling of the furniture is concerned.

Kitchen, which makes you idiosyncratic.

We all have individual preferences and likewise differ from each other. There is something special about standing apart from the crowd that gives you a unique distinction. It builds one's persona that emerges from the choices made by oneself.

This kitchen idea is one of such examples where you can stand out from the crowd by using a contemporary colour palette. The coral reef coloured kitchen will grab attention of your guests and the use of CUBE in your kitchen will be something which will put them in the state of awe. It adds eloquence to the kitchen interiors with the ease of accessibility.

Traditional with a pinch of contemporary.

With evolution & advancement in design and aesthetics you can see new trends in furniture design coming everyday but traditional design never goes off the trends.

The new cube can be used in your present kitchen in such a beautiful manner that you will have new wall in your kitchen without the hassle of renewing the old.

Extending your shelf space without struggle.

Everyone knows the importance of extra shelves and storage space at your workstation, no matter how much space you give to keep your files, sketches, books, folders etc. you will eventually need more space over the time.

The Cube by Hettich solves this problem and allows you to add as many shelves you want and as many times you want. So, now you dont need to worry about the space of storage at your workstation.

I'm a Millennial.
I like my tea in London,
coffee in Turkey.

Millennials are a restless lot unable to sit at one place for a long time. Basically they prefer to work in a comfortable environment. This said, design aesthetics is a big time priority with this generation. The age of heavy & bulky furniture is so passe! This is the age of minimalism.

The CUBE converts the regular overhead storage spaces into aesthetically pleasing furniture items which restructures any given wall of your house into a design statement.

Not your average Living-Room.

Aesthetics are important but you can't ignore the importance of storage. In the era of minimalistic approach and high space utilisation, one has to create a balance between the two while designing the house and Hettich CUBE helps you to achieve the same.

This design lets you make your living area aesthetically beautiful with ample storage and accessibility area using Hettich CUBE.

Confluence of Aesthetics & Functionality.

Aesthetics are important but you can't ignore the importance of functionality. In the era of minimalistic approach and high space utilisation, one has to be between the two while designing the house and Hettich CUBE helps you to achieve the same.

This design lets you make your living area aesthetically beautiful with ample storage and accessibility area using Hettich CUBE.

When your stairs are Pretty as Peach.

The stairs area of houses are often neglected but in the era of optimum space utilisation no inch of your house can be left behind.

The CUBE by Hettich is a one of a kind furniture solution which can be used in numerous ways and one of which is using it as display/ house decoration shelving system.

When your furniture is Geometrically Congruent

IN the contemporary furniture design proportions are playing a major role in the aesthetic language. People are more concerned about the congruous design of their furniture.

This design lets you make your living area bedroom area aesthetically beautiful which is geometrically congruity with ample storage and accessibility area using Hettich CUBE.

Life's too short to live
in a dreary home.

Everyone has a place or a spot in their house which they want to keep their favourite and prized possessions and show them to their guests. This spot becomes

The Hettich CUBE helps to achieve this particular spot where you would like to place your favourite books, vase or your favourite heels.

My favourite
look is one that's
unique.

When being different is in your nature. You
make your home prettier than all of your mate's
and that makes you stand out from the herd.

This design lets you make your living area
aesthetically beautiful with ample storage and
accessibility area using Hettich CUBE.

Tranquility amidst hustle of the house.

Everyone has a place or a spot in their house where they feel relaxed. Eventually this chosen place becomes their relax zone where they would like to retreat at the end of the day with a cup of coffee to soothe and relax their stressed nerves.

This idea leads the way to the necessity of having a tranquil spot. The Hettich CUBE helps to achieve this particular spot where you would like to place your favourite books, vase or your laptop along with a cup of tea.

Full-time reader Part Time Designer.

Who doesn't want to have a personal library at home where they can place their collection and enjoy reading their favourite books. Gone are the days of heavy looking bulky library. This is the age of sleek book storage which solves dual purpose of esthetic storage with easily retrieval.

As projected, in this concept, you can see the personalized library which actually doesn't look like a library but works like one with a complete modern touch. The Hettich CUBE has made it possible to put this idea into reality with its door sliding to hide the unwanted things kept in the storage.

Away with convention,
give me freedom.

Millennials are a restless lot unable to sit at one place for a long time. Basically they prefer to work in a comfortable environment.

The age of heavy & bulky furniture is so passe! This is the age of minimalism and portability. The Hettich CUBE allows you build a minimal, light and portable lifestyle.

An island in the hustle of Kitchen.

Above the island space in any kitchen, CUBE can easily provide multiple shelves to keep jar, planters, decorative crockeries etc. which will add to the aesthetic element as well as give you extra storage space in the times ahead. A beautiful, minimal, picture perfect kitchen.

Furniture which is well-educated.

Kindergarten schools are prone to being unorganized with regard to the storage of stationery, books and stuff related to kids.

Here portable Cube trolley with enclosed bottom area with shutter to keep all stuff secure and carry wherever kids are playing for his/her convenience is perfect for kids zone.

Modern art needs modern viewing.

As Postmodern Art galleries are depicting more openness and neat spaces, the exhibitions today need to be designed for reusability but without restricting the artist's idea of displaying their artworks.

The Hettich Cube is an excellent solution to display Artifacts where rest of the furniture elements become invisible.

Modern art needs portability.

Inside Gallery, artist can take artefacts from one place to another in CUBE in an organized manner. Giving artist freedom of portability and flexibility to display his or her artwork in their desired manner.

CUBE MODULES

The Hettich CUBE is designed in a way that it offers complete design flexibility. Designer/ Architects can play with the form of actual Cube and design breakthrough ideas using Hettich CUBE. It is a versatile shelving system which can be used in any space.

Why You Should Use Cube?

The question should be "Why should we use Cube?" Cube not only displays the modern, contemporary design aesthetics which will bring life to your home but it is also a multi utility item which can be used in different furniture types. It also gives you the chances of customizability and last but not least it is very simple to install and easy to assemble. So, now you answer "Why not Cube?"
