Hettich

Fascinate with hinge variety: Intermat

Anyone choosing Intermat hinges will benefit from decades of experience. Added to this is tested long life, high quality and good value for money.

Numerous door mounting options for virtually any application are typical of the Intermat hinge range.

The range not only features hinges for various face angle applications and opening angles, e.g. for 110° or 125°, profile door hinges as well as hinges for glass doors, folding doors and aluminium framed doors but also includes versions customised for specific door mounting styles.

Gentle and quiet: Silent System

Closing furniture doors produces irritating noise in the home environment. Intermat with Silent System controls the movement of furniture doors, leaving them to close quietly and gently.

For immediate peace and quiet, enhancing the feel good factor.

The optional Silent Systems comes in a variety of versions.

The clip on Silent System element clips onto the hinge arm particularly easily and quickly.

The screw on Silent System element is screwed to the cabinet body top or bottom panel without having to drill holes first. A further version for screwing on is the hinge cup Silent System element. This screws to the hinge cup, forming a line with the hinge arm.

With all three Silent System elements, the Silent System closing action can be optimally adjusted to suit the size and weight of the door with an adjustment wheel.

Tried and proven millions of times

Tried and proven in millions of applications over many years, the hinge is characterised by its sleek design. A real looker on modern fronts.

Whether kitchen, bathroom or bedroom: Intermat provides the right solution for all furnishing styles thanks to its design, performance and quality.

In all aspects of life

Outstanding quality

Intermat means top quality and promises the user lasting satisfaction. For Hettich, internal inspections in the production process go without saying.

Attaining Level 3, the endurance test under DIN EN 15570 was passed with flying colours.

Benefits at a glance

Tried and proven fast assembly hinge

Intermat benefits from tested durability, high quality and good value for money.

Simply clip on

Ergonomic clip on installation characterises the Intermat range. No tools are needed for mounting the doors.

Optional upgrade

Silent System lets you differentiate furniture ranges with optional soft closing.

Secure installation

A light press on the hinge is all it takes. As it clips on, it makes a sound that can be clearly heard, indicating accurate engagement.

Handleless perfection

Push to open provides a neat way of addressing handleless furniture trends.

Easy to remove

Released at the press of a finger, fronts are incredibly easy to change. Secure engagement prevents any uncontrolled detachment.
