How will we work in the future?

This is an exciting question what we are working on intensively. The fact is that not only megatrends, but also extraordinary events such as a pandemic are changing the world and influencing us in all areas of life.

In the long term, the way we live, act and furnish ourselves will change. The megatrend Work Evolution is being felt much more intensively and quickly.

Work Evolution

Goodbye performance society. Artificial intelligence based on innovative machines will relieve us of a lot of work in the future and even do better than we do. But what do we do then? That's a good question, because it puts us right in the middle of a fundamental change in the world of work.

The creative economy is on the advance and with it the potential development of each individual. Instead of a meritocracy, the focus is shifting to an orientation towards the strengths and abilities of the individual. New fields of work require a new, flexible working environment and the work-life balance is becoming more important.

Visualizing a Scenario

Imagine, your office chair is your couch and your commute is the length of your hallway. Your snack drawer is your entire pantry. Do you think it's a dream? No! Since work-from-home is very a reality these days due to the pandemic crisis 2020.

Now some of them find it hard and struggle to do with many reasons behind it such as dividing work time and personal time, noisy neighbors, being indolent and many other distractions at home.

However, since most of the homes are not designed to also function as offices, it leads to distractions and dip in productivity.

We at Hettich have been at the forefront of recognizing the need for such solutions and accordingly have designed innovative work-from-home furniture solutions that will enable one to work comfortably and productively.

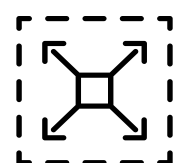

Eight elements of home office design

Location is the key.

Home offices come in many different shapes and sizes. It can be in a separate room, a quiet corner or even in your kitchen. The key to selecting the right place for your home office is to think about where and when you do your work.

Allow enough space.

Make sure you allow enough space to work comfortably. Ask yourself if you will be able to move easily from side to side, stand up and sit back from your desk.

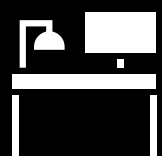

Colour is important.

Colour is a super important detail. The wrong colour can have a negative effect on your desire to spend time in this room and can even hinder productivity. Pay special attention to your personal colour needs.

Invest in a great chair.

A chair is just as important, if not more important than the desk. Choose a chair that fits your body and promotes proper posture while working.

Desk is an essential.

A proper desk is the key to working comfortably from home. You need to like working at it because unless you feel comfortable, work might become a drudgery.

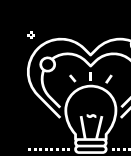

Let there be light.

Good lighting is critical for any home office space. Choose a location with some natural light and a view, if possible. Position your desk to face the windows or in a location where your computer screen will not be affected.

Organization is a necessity.

Storage is often overlooked when designing a home office and can really affect your productivity. Make sure to include enough shelving, filing cabinets or cupboards for your storage needs.

Inspire yourself.

Set up a mini-shrine — a few cherished knick-knacks, a piece of framed art, a special photo on your desk — that motivates you to create and/or get the work done so you can get out of there.

Home Office Furniture Ideas

In these uncertain times, our working has also evolved and work-from-home has become the 'New Normal'.

This book is a collection of practical and easy to implement Home Office furniture ideas with a good balance of aesthetics and functionality.

The most productive corner of the house.

Every house is different. It comes in varied shapes and sizes. In this concept, we showcase how one can create a neat working corner in the house, which has every element of the work office including a good desk.
