

ArciTech sets for retailers and tradespeople

Drawers and pot-and-pan drawers in just a few steps

Coming with all the components needed to make any chosen design of drawer, *ArciTech* drawer sets are available for retailers and tradespeople. Hettich gives cabinet makers and fabricators the choice between all inclusive sets and flexible sets.

ArciTech all inclusive sets

The all inclusive sets come with the advantage of being able to produce the right drawer and pot-and-pan drawer in just two easy steps. The first step involves selecting the drawer side profile height, the drawer or pull-out type as well as the finish and nominal length. All that remains in the second step is to select the appropriate runner: 40, 60 or 80 kg load capacity, with *Silent System*, Push to open or *Push to open Silent* function.

Flexible ArciTech sets

The capability of using steel rear panels provides economic benefits when selecting flexible sets. But the perfect drawer solution is quickly created with customised carcass widths too. After selecting drawer side profile height, finish and nominal length, you simply choose the type of rear panel. Side elements and runners meeting the particular requirements complete the selection. At the fabricator, all there is to do is add the base and/or rear panel for customised carcass widths and fit them to produce the drawer. Selecting the chosen elements couldn't be faster or easier.

ArciTech sets are available from Hettich retailers or direct from the
