

Roasting and baking has never been so simple and convenient.

Quadro 3 oven shelf runner

- Part extension slide
- High lateral stability for a safe handling of dishes and food
- Outstanding accessibility: keeps the user from having to reach inside the oven
- Easy and smooth pull-out of shelves and cook ware (keeps food from spilling)

Quadro 3 oven shelf runner

Quadro runners make cooking and baking particularly convenient and ergonomic. Because Quadro-based telescopic systems show where their talents lie when handling food cooking in the hot oven.

They permit safe access to the baking tray: The slide systems support the baking tray or oven shelf every inch of the way, preventing cooking from rolling over as it's pulled out.

In the extended position, turning or basting food is not a problem. The smooth, easy runner action prevents liquids from spilling over when moving shelves in and out

Technical specifications

Function	Specification
Material / surface	Stainless steel
Max. load capacity	up to 10 kg for 10 000 cycles Static load: 16 kg
Temperature range	Operating temperature: 300°C Short-time peak 330°C
Corrosion test	Corrosion-resistance
Lubrication	Temperature resistant grease Food grade (H1 approved)
ROHS	Compliant
