| The access identity card is a personal document. Wear the card always on the body and do not let anybody access your card.  Make sure that no outsider or unauthorised person enters along with you in the company premises or in our buildings.  Obligation to maintain secrecy of all information of and on Hettich according to the secrecy agreement done between my employer and Hettich.  Ban on photography on the whole premises. If required obtain an approval from Hettich and carry it with you while photographing.  2 General Information  Discussed driveways, entries and factory traffic.  Pedestrians use only doors. Gates are reserved for industrial trucks and transport vehicles  Vehicles and fork lifts must be expected on the whole premises and in the halls.  Safety instructions and regulations for the respective operating site must be gathered from the responsible Hettich employee (e.g. escape routes, first aid kits, sanitary facilities, security service).  Appropriate personal protective equipment must be provided by the contractor and must be used (safety shoes, ear protection, fall protection, protective gloves, safety glasses, breathing mask etc.). Obligation to wear PPE was discussed.  Specific prohibitions on site were discussed.  Specific prohibitions on site were discussed.  Prohibition of using hazardous substances (for toxic and carcinogenic substances) was discussed. If the use of such substances is required, obtain approval from Hettich.  Selective sorting of garbage: scrap, cardboard, residual waste, hazardous waste and their proper disposal.  Emergency measures for incidents with environmental risks were discussed.  Mentioned the safe use of electrical use and visual inspection before starting work. Only use tested tools.  A mobile circuit-protection device is mandatory for all operations with electrical equipment.  Identified deficiencies (occupational safety, environment, energy efficiency) must be reported to the responsible Hettich employee immediately.  Work place related instruction  Risk assessme |   |

| In case of fire or smoke emission activate the evacuation clarm immediately and if possible try to extinguish, etherwise sock assembly point   |   |
| immediately. Consider emergency routes on site before starting to work.  |   |
| 5 First aid organisation   |   |
| Information on reporting obligation to Hettich, how to behave in case of occupational accidents, especially transmission of an emergency call.   |   |
| After an accident was caused the responsible Hettich employee has to be informed in order to direct the ambulance to the injured person.   |   |
| The names of people responsible for first aid are known in the respective areas (see first aid boxes). Minor injuries are to be entered only in the own accident book.   |   |
| 6 Contact person   |   |
| The responsible Hettich employee was named.  |   |
| Internal emergency number available ☐ yes ☐ no ☐ If yes, telephone number:   |   |
| This content was explained to me in a personal discussion. Furthermore, I was trained with the help of the Hettich document "Standard instructions for external companies". I was explicitly instructed on the necessity of the measures for preventing accidents. I have understood them and they will be followed by me as they mainly aim at my health and also avoid unnecessary loss and costs. Non-observance can lead to an expulsion from the location!  I was instructed to carry a copy of this instruction protocol every time within Hettich premises and the copy shown to be older than 12 months.   |   |
