

## Wooden drawer perfection

### Quadro provides many ways to differentiate

The *Quadro* bottom mounted drawer runner brings a look of elegance and perfect performance to any wooden drawer. Complementing the line up with optional synchronisation for the Push to open function as well as a 4D front panel adjustment capability, Hettich notches up the *Quadro* range.

The *Quadro* 4D adjustment capability lets you adjust drawer fronts vertically, laterally and in depth and tilt all as standard. This also provides the perfect solution to realising large size drawer fronts with narrow gaps. The adjusting mechanisms are easily accessible and, with a different surface feel, easy to tell apart. This makes adjustment fast, straightforward and intuitive.

The Push to open function underpins purist, handleless furniture design with the tried and proven qualities of *Quadro* drawer runners. A light press on the front panel activates the opening mechanism, leaving the drawer to open all by itself. The optional synchronisation function significantly increases the activation area on the front panel and makes drawers even easier to open.

Suiting any application, *Quadro* drawer runners give furniture and kitchen manufacturers the perfect answer to meeting any demand in furniture design without having to make any change to wooden drawer or carcass. From plug on partial extension runner to full extension runner with 4D front panel adjustment. The same applies to the full scope of functions from StopControl self closing to Silent System. As such, *Quadro* gives furniture and kitchen manu-
