

## **Design variety, high efficiency**

**Systems from Hettich meet the demands of market and production alike**

**High market coverage from a differentiated furniture range, in harmony with lean production – not a problem with drawer and runner systems from Hettich. The new *AvanTech* premium drawer system and wooden drawers can be fitted on identical *Actro 5D* runners. The capability of using them in combination with *ArciTech* drawer system while leaving the carcass drilling pattern unchanged exponentiates the design options.**

Personal style is a key criterion for furniture buyers: the outer appearance and interior of a piece of furniture needs to go with their personal home environment. For furniture manufacturers, this means realigning their carcasses to satisfy many different tastes and segments – or take advantage of the options provided by the new, extended Hettich platform: drawers tailored exactly to suit target consumers and furniture design while benefiting from lean production.

### **Upgrading made easy**

The standardised carcass drilling pattern means that in addition to the *ArciTech* drawer system it is also possible to use the *AvanTech* premium drawer system and wooden drawers, both on identical *Actro 5D* runners. Within the *ArciTech* and *AvanTech* platform concepts, numerous options are also provided for differentiating between furniture ranges: *ArciTech* offers seven heights, five attractive surface finishes as well as DesignSide, TopSide and

railings for configuring the drawers. *AvanTech* in high quality aluminium is available in five heights.

All systems impress with unique smooth running action and exceptional stability in the 40 kg, 60 kg and 80 kg load categories – maximum flexibility in designing furniture. Purist design both inside and out is made possible with opening systems, like a mechanical *Push to open* which, softly opening in the form of *Push to open Silent*, combines design with convenience, and the electromechanical *Easys System*.

The following picture material is available for downloading from [www.hettich.com](http://www.hettich.com):

Living with perfection: *AvanTech* meets the most exacting demands on design with sleek looking perfection, sharply rounded edges and no breaks in the drawer side profile. Photo: Hettich

Precision that excites: any front panel can be precision aligned with the *Actro 5D* runner. Can be used with the *AvanTech* drawer from Hettich and with high quality wooden drawers. Photo: Hettich

Made for the future: the front panel drillings for the railing are also suitable for *DesignSide*, *TopSide* and customised elements. As such, the *ArciTech* drawer system in itself provides a further design platform. Photo: Hettich
