

For the perfect marriage of functionality and aesthetic appeal

Sensys with integrated Silent System for glass applications

Furniture featuring glass elements bring elegance to any living room. With its narrow bonding surfaces, the *Sensys* hinge for glass applications creates a perfect purist look. Whether classy glass display cabinets or a modern material combination of wood and glass – the hinge perfectly blends into the furniture's overall appearance.

Sensys for glass applications combines exquisite design and outstanding performance. The integrated Silent System and large automatic closing angle make sure the delicate glass doors close gently and reliably every time. The standard *Sensys* range is combined with the *Sensys* hinge for glass applications. For instance, the standard mounting plate can blend with a glass door for a material mix of a wooden body and glass. The simple glue mounting is the perfect solution for design that stands out from the crowd.
