

Functionality and Performance: Features of the AvanTech YOU Drawer System

An Article Series

Montréal, Québec – July 20, 2020 – With the official launch of the [AvanTech YOU drawer system](#) just around the corner, Hettich is excited

to make complete customisation in furniture a standard. In addition to its German engineered aesthetic, the new drawer system is highlighted for its optimal functionality and performance. With AvanTech YOU, you can create superior furniture design and impress your customers with great performance – regardless of the load class. Combine

drawers and runners and tap into new market segments with your own application solutions for bathrooms, kitchens, living rooms or shop fitting.

Differentiation in Perfection and Convenience

Use the adjustment capabilities (vertical, lateral and tilt) provided by AvanTech YOU to obtain reveal alignment to your front panels. Combined with the right runners and user-friendly functions, AvanTech YOU is the ideal choice your particular application and furniture design. Additionally, the designer profile on the drawer side not only provides a style element but conceals the drawer tilt adjuster.

Hidden Working Parts and Perfect Drawer Side Profile Design

All the advantage of a system drawer for optimum adjustment and assembly have been integrated into the drawer side profile and are hidden from view behind its immaculate, purist design. Simply slide the exterior décor back and you'll see the unique sliding mechanism makes it possible to release the front panel and adjust it both vertically and laterally. After releasing the front panel, it drops into a retained position for easy removal to ensure safety for you and your family. The drawer system is an intelligent solution, particularly for large, wide front panels.

Clever Functions, Precision and Superb Performance: Actro YOU and Quadro YOU

The drawer runner is the basis for superior, customisable furniture design. It gives furniture absolute perfection you can see, feel and hear. One drawer system, two runners and an identical drilling hole pattern make it possible to create a wide variety of furniture designs for different applications. Furniture is differentiated by a whole range of user-friendly functions.
