

Miniature effort, maximum performance

BlueMax Mini Modular

The compact automatic drilling and insertion machine with interchangeable drilling unit is stirring up the market: It is also in command of producing 90° offset drilling patterns, e.g. for drawer runners.

Automatic drilling and insertion machines are essential for rational, precision assembly in the workshop. The *BlueMax* series from Hettich provides the professional wood-worker with a wide choice of high-quality machines. This range has the right model to suit the demands of any workshop. In deciding which option to choose, it's not only a machine's performance profile and purchase price that are important but also but also the amount of space it takes up in the workshop.

Small in size yet big on results: The product from Hettich combines mature technology with compact design: The *BlueMax Mini Modular* is no bigger than the tried and proven *BlueMax Mini 3* but comes with the performance of the large *BlueMax Modular* models: interchangeable drilling equipment, mechanic drilling stroke limiter, fixed stops for frequently recurring hole spaces and a whole lot more. The comprehensive range of accessories meets all of a workshop's specific needs.

The interchangeable drilling units and the ease with which the machine is set up save time and go a long way towards optimising the workflow in the workshop. There are these drilling units to choose from:

- 6-spindle drilling unit for connectors and hinges
- 9-spindle drilling unit for hole lines
- 9-spindle drilling unit, offset by 90°, for drawer runners

In conjunction with the 90° offset unit, the *BlueMax Mini Modular* can give carpentry workshops a noticeable competitive edge. But this isn't all that makes the "little giant" a hot tip.

Individually selectable accessories for the *BlueMax Mini Modular*:

- Foot pedal
- Adjustable centre stop in the workpiece support
- Continuation stops for drilling hole lines
- Pneumatic hold-down clamp for fixing workpieces
- Swivel unit for dies* to insert fittings
(*existing insertion dies can be used)
- Fence extension for lengthening the workpiece stop
- Drill bits
- Insertion dies

The following picture material is available for downloading from www.hettich.com:

The *BlueMax Mini Modular* complements the range and combines the benefits that come with *BlueMax Modular* and *BlueMax Mini Type 3*.
