

New drawer runner for refrigerator and freezer compartments

Quadro Compact runner line from Hettich

The new *Quadro Compact FE 20* drawer runner for small crisper compartments complements the *Quadro Compact* range – for consistency and a feel of luxury in the refrigerator and freezer.

Quadro Compact FE 20 can carry loads of up to 20 kg and is ideal for small crisper compartments. Benefiting from *Silent System*, compartment closure is characterised by soft, quiet action. Hybrid ball bearings and gently cushioning end stops provide extremely smooth running performance. It is available with detent-in and self closing function and *Silent System*, in white or any chosen finish – different refrigerator ranges are easily upgraded with this modular system.

With its runner line, Hettich covers the 20, 40 and 80 kg weight categories: *Quadro Compact FE 20* for small compartments, *Quadro Compact FE 40* for large crisper compartments up to 40 kg and *Quadro Compact HD* for large front drawers up to 80 kg. The benefit: the entire refrigerator and freezer can be equipped with one single range of runners. All *Quadro Compact* drawer runners are hidden from view and cater to the trend towards integrated functions.
