

Wow programme for the dishwasher

ComfortSwing from Hettich

***ComfortSwing* is the first lifting system on the market to raise the dishwasher's bottom rack to the level of the top rack. This is particularly convenient for the user and, with integrated Silent System, also gentle on dishes and glasses.**

Hettich developed *ComfortSwing* to make loading and emptying the dishwasher more ergonomic. The result is a lifting system that is good for the back and steals the show from the host of any kitchen party. Because *ComfortSwing* makes kitchen work easier and is a pleasure to use.

Dishwasher with wow programme

ComfortSwing takes household convenience to a new level: after the bottom rack is pulled out, it is slightly raised. This is where the fitting's clever lifting mechanism comes into play, making the cushioned lifting movement feel easy and safe for the user. The rack automatically engages in the raised position. After loading or emptying, the rack is unlocked using an additional handle located below the actual rack handle and moved to the starting position. Thanks to the integrated Silent System, the dishwasher rack gently and quietly glides back home.
